Professional Summary

DevOps and Cloud Infrastructure Engineer with 3.8 years of experience delivering enterprise Azure environments and AI-assisted CI/CD workflows. Built and tested Azure DevOps pipelines for 6+ applications at Xome; previously reduced deployment time from four hours to under 30 minutes and delivered \$130K+ in annual cloud savings at Deloitte. MS ITM candidate at UT Dallas, graduating in December 2026.

PROFESSIONAL EXPERIENCE

Xome (part of Rocket Companies) May 2026 - Present
AI DevOps Platform Intern | Lewisville, USA

- Delivered AI-assisted Azure DevOps CI/CD pipelines for 6+ applications, translating requirements into tested workflows within one week per application.
- Guided generation and validation of AKS architectures, Kubernetes manifests, Dockerfiles, and ACR integrations against application and deployment requirements.
- Built workflows for application builds, tests, image publishing to ACR, and AKS deployment; used SKILL.md and MCP servers to give AI agents project-specific context.

Deloitte. Support Services Pvt. Ltd. July 2021 - December 2024
Analyst - Cloud Infrastructure Engineer | Bengaluru, India

- Designed and supported enterprise Azure infrastructure across production subscriptions; automated VM, certificate, and database administration with PowerShell and SQL, reducing manual effort by 60%+.
- Engineered Azure DevOps CI/CD pipelines that reduced deployment time from four hours to under 30 minutes and delivered \$130K+ in annual savings through rightsizing and lifecycle policies.
- Remediated critical cloud vulnerabilities, maintained security compliance, and earned a June 2023 promotion and multiple Spot Awards for operational excellence.

EDUCATION

The University of Texas at Dallas Expected December 2026
Master of Science, Information Technology and Management **GPA 3.52**

Christ University, Bangalore May 2021
Bachelor of Computer Applications, Computer Science **GPA 3.42**

PROJECTS

CloudVeyra Monitor
Built a browser-only Azure operations dashboard with searchable resource views, realistic sample telemetry, resource health and activity context, a conceptual Azure Resource Graph flow, and an AKS scaling workflow with simulated pod readiness and deployment events.

TECHNICAL SKILLS

Certifications	Microsoft AZ-900 (Azure Fundamentals), AZ-104 (Azure Administrator)
Cloud	Azure VMs, Storage, Networking, Key Vault, Azure Monitor, Disaster Recovery
DevOps	Azure DevOps, GitHub Actions, Git, Docker, Kubernetes, AKS, ACR
AI & Automation	SKILL.md, MCP Servers, Claude Code, LLM Integration, Prompt Engineering
Programming	PowerShell, Python, SQL, Bash, C#
Monitoring & Tools	Power BI, Excel, SSMS, SQL Profiler, Venaafi
